HUG *a* TREE

Our Soul Medic

Have you ever tried hugging a Tree?

Trees symbolize stability, patience, strength and growth as they stand tall and grounded, acting as a constant observer to the environment around them. Apart from the obvious benefits that a tree provides us with, they are also our spiritual healers.

Trees give out the energy and vibe of safety, security and stability, hence by coming in contact with a tree you will pick these vibrations whether you are consciously aware of it or not. Hugging a tree is the most simplest way of revitalizing your energies inside out. You begin to resonate with the tree's energy and you become more grounded, centered and calmer.

We can envision ourselves as **treelike beings**, imagining that we have roots reaching down into the Earth, energetic strands that keep us connected and at the same time the crowns of our heads lift and open to receive nourishment from the sky above.

Surrender to Mother Nature by opening up your frequency, let the unique vibrational patterns of the trees take over and reset yourself.

So next time you find yourself feeling low ...

Go. Hug a tree !

I took a walk
in the woods,
and came out
taller than the trees...

Live in a harmonious union of
LUXURY & NATURE
